

He is **BIG, Hairy** and is coming to **HAUNTSVILLE**

There have been whispers and I have heard rumors, but until now it has all been hearsay.

Yesterday Louis D, the village photographer was out in the forest photographing spring wildflowers when suddenly he looked up and there he was. Striding through the forest was

SASQUATCH

That's right, you heard it here first.

It does not matter if you call him Yeti or Bigfoot (and yes he has really big feet) or more formally Sasquatch, he is on his way to Hauntsville.

For proof you can see Louis D's photograph below.

Don't say I didn't warn you!

Hello everyone. I'm Larry Treadwell, I am a Village Landlord and I build villages. While we all start with those beautiful (and expensive) little houses I've spent years adding my personal touch to all my villages. Details and little things to make you smile are scattered throughout

all my villages. One of the additions to my Haunsville Display will be the Yeti, the man of the shadows. Sasquatch will make his first appearance in Haunsville this fall.

Truth be told, I made him myself. He is cut from balsa wood, and painted black (but you could just as easily make him out of cardboard). The dead tree to his right I made from floral wire and while I cut out the signboard, my ever supportive wife did the lettering (if I made the lettering you could never read it). Also in the scene are several oak trees, a coffin, and a stone wall. All things I have made for my village.

I urge you to stop by frequently as I'll be providing tips and ideas for adding those special touches to your village that no one else will have. I'm currently working on a three part series detailing how I build trees. Eleven different types of trees will be discussed in the three articles.
